SUMMARY

Full-stack Software Engineer with over 5 years of experience developing production-grade platforms and open-source SDKs. Expert in the TypeScript and Node ecosystem, with a proven track record of building scalable systems and responsive frontend features. A collaborative teammate with extensive experience working cross-functionally to bridge the gap between complex technical solutions with business goals.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Go, Python, C#, Java, C, C++

Technologies: Node.js, Next.js, React.js, Vue.js, Express.js, GraphQL, .NET, Spring

Databases & Messaging: MySQL, PostgreSQL, Prisma, Redis, MongoDB, AWS S3, Kafka

Testing: Selenium, Jasmine, Jest, Mocha, Chai, Integration testing, End-to-end testing

Tools: Git, Vercel, Jenkins, Docker, Jira, Github Actions, Contentful CMS

EXPERIENCE

Freelance Software Engineer

Sep 2025 – Present

Independent Contractor

Burnaby, BC

- Acted as a subject matter expert (SME) to evaluate large-scale code generation models, ensuring generated output met production standards for security and correctness
- Authored detailed technical post-mortems and insights to improve model reasoning, explaining high-level concepts such as memory management, concurrency, and API design for model RLHF (Reinforcement Learning from Human Feedback)

Senior Software Engineer(Lead)

Nov 2022 – Oct 2024

ECAD Labs Inc.

Vancouver, BC

- Led development of a production-grade open-source TypeScript platform and SDK used by a broad developer community, owning both backend architecture and external-facing APIs
- Designed and implemented backend services and APIs while collaborating with frontend and ecosystem partners to ensure seamless integration
- Architected and implemented new public APIs, expanding SDK capabilities while minimizing breaking changes across frequent protocol updates
- Actively supported production users via GitHub issues and community forums, diagnosing complex edge cases and improving developer experience

Software Engineer

Nov 2021 – Nov 2022

ECAD Labs Inc.

Vancouver, BC

- Delivered full-stack features spanning backend logic and frontend-facing APIs using TypeScript and Node.js
- Wrote comprehensive integration tests to prevent regressions across protocol changes, promoting early bug discovery in protocol updates, leading to significantly more stable releases
- Developed and integrated a custom feedback component for our product's documentation website, architecting an end-to-end pipeline that streamed user sentiment data directly into Google Analytics for real-time analysis

Software Engineer in Test

Mar 2020 – Nov 2021

Electronic Arts Inc.

Burnaby, BC

- Developed scalable automated test frameworks for REST and GraphQL APIs using TypeScript and modern JavaScript testing libraries, ensuring more than 85% test coverage
- Monitored and debugged production systems using New Relic and Kibana, identifying performance issues and supporting incident resolution

QA Test Engineer

Sep 2019 – Mar 2020

Vipre Security

Burnaby, BC

- Built an automation template generator using Go to rapidly scaffold integration and end-to-end test suites, accelerating adoption across new projects

EDUCATION

Simon Fraser University

B.S. Computer Science, Graduated with Co-op

Aug. 2021 – May 2025

Burnaby, BC
