SUMMARY

Full-stack Software Engineer with 5+ years of experience building production-grade TypeScript and Node.js platforms, from open-source SDKs and GraphQL/REST APIs to responsive React frontends. Proven track record delivering scalable systems with measurable developer and business impact across fintech, gaming, and security industries.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Go, Python, C#

Frameworks & Runtimes: Node.js, Next.js, React.js, Vue.js, Express.js, GraphQL, .NET, Spring

Databases & Messaging: MySQL, PostgreSQL, Prisma, Redis, MongoDB, AWS S3, Kafka

Testing: Jest, Mocha, Chai, Jasmine, Selenium, integration testing, end-to-end testing

Tools: Git, Docker, GitHub Actions, Jenkins, Vercel, Jira, Contentful CMS

EXPERIENCE

Freelance Software Engineer | Independent Contractor | Burnaby, BC | *Sep 2025 – Present*

- Act as a subject matter expert (SME) evaluating large-scale code generation models, ensuring generated TypeScript and Node.js output meets production standards for security, correctness, and performance.
- Authored technical post-mortems and RLHF training insights on advanced topics including memory management, concurrency, and API design, directly improving model reasoning quality.

Senior Software Engineer (Lead) | ECAD Labs Inc. | Vancouver, BC | *Nov 2022 – Oct 2024*

- Architected and led development of a production-grade open-source TypeScript SDK and developer platform, growing it into the most-used TypeScript library in its ecosystem with 300+ GitHub stars.
- Drove business growth by integrating complex RESTful and RPC APIs into a performant React frontend, delivering a stable platform for client demonstrations and enabling successful partner acquisition.
- Served as primary technical liaison for ecosystem partners, proactively communicating API changes and new features to ensure seamless integration across 20+ external developer teams.
- Championed developer experience through active community support on GitHub issues and forums, diagnosing complex edge cases and reducing friction for SDK adopters.

Software Engineer | ECAD Labs Inc. | Vancouver, BC | *Nov 2021 – Nov 2022*

- Designed intuitive TypeScript abstractions over complex protocol operations, enabling 20+ external partners to integrate successfully and accelerating platform adoption across the developer community.
- Built an end-to-end user feedback pipeline for the documentation platform, streaming sentiment data into Google Analytics in real time, resulting in a 50% increase in reader satisfaction.
- Improved SDK release stability by authoring comprehensive integration test suites, achieving a 75% reduction in post-release support requests by preventing regressions across protocol updates.

Software Engineer in Test | Electronic Arts Inc. | Burnaby, BC | *Mar 2020 – Nov 2021*

- Built scalable automated test frameworks for REST and GraphQL APIs using TypeScript and modern testing libraries, achieving 85%+ test coverage across multiple product teams.
- Monitored and debugged production systems with New Relic and Kibana, identifying performance bottlenecks and supporting incident resolution.

QA Test Engineer | Vipre Security | Burnaby, BC | *Sep 2019 – Mar 2020*

- Built a Go-based automation template generator that reduced manual testing time by 2 hours per feature and drove a 30% increase in automation coverage across new projects.

EDUCATION

B.S. Computer Science | Simon Fraser University | Burnaby, BC | Graduated Jun 2019 (with Co-op)
